| The MAILING DATE of this communication appears on the cover sheet with the correspondence address All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS. This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308. |   |                   |
| 1. This communication is responsive to <u>Amendment filed 08/30/06</u> .   |   |                   |
| 2. 🔀 The allowed claim(s) is/are <u>4 and 11-14</u> .  |   |                   |
| 3.  Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).  a)  |   |                   |

## **REASONS FOR ALLOWANCE**

Page 2

1. The following is an examiner's statement of reasons for allowance: claim 4 is patentable over the prior art of record because of the specific configuration of the multibeam optical scanning device, which comprises a light source having plural luminescence parts arranged apart from each other in both a main-scanning direction and a sub-scanning direction, a rotating polygon mirror which has reflection surfaces for deflecting plural light beams emitted from the plural luminescence parts, respectively, a first optical system which is arranged in an optical path leading from the light source means to the rotating polygon mirror and converts the plural light beams into convergent light beams or divergent light beams, and a third optical system which guides the plural light beams deflected by the rotating polygon mirror onto a surface to be scanned of a drum shape having a rotation axis along the main-scanning direction, wherein, in a subscanning section, the respective light beams to be made incident on the surface to be scanned are made incident such that principal rays thereof form an angle with respect to a normal line of the surface to be scanned, respectively, whereby when it is assumed that a positional deviation is caused in a first direction relatively parallel to the mainscanning direction between focusing points of the respective light beams on the surface to be scanned, a positional deviation is caused in a second direction relatively parallel to the main-scanning direction between the focusing points of the respective light beams on the surface to be scanned as convergent light beams or divergent light beams are made incident on the third optical system in the main scanning direction, and, when the light beams emitted from the plural luminescence parts have a relative wavelength

difference, a positional deviation is caused in a third direction relatively parallel to the main-scanning direction between the focusing points of the respective light beams on the surface to be scanned due to the relative wavelength difference, and wherein a conditional relationship exists between the various parameters of the optical components of the scanning device. The combined limitations as currently claimed are not taught by the prior art of record considered alone or in combination.

Claims 11-14 are allowed because they are directly or indirectly dependent from claim 4 above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hai C. Pham whose telephone number is (571) 272-2260. The examiner can normally be reached on M-F 8:30AM - 5:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vip Patel can be reached on (571) 272-2458. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
